

邪真大讲堂

Recently learning university university... I am Gakuenka's student. Please, please support and help me in my studies. I am not good at English, so I am not good at English.

The last year of Gakuenka is divided into two schools, one is the inner school, the other is the outer school. While the Dark Spirit Of Mental Life and the Light Spirit Of Mental Life of the outer school.

Have no much difference, to increase their life depends on the students themselves, just differ in the date learned.

However, the two schools of the Dark Spirit Of Mental Life are totally different. The students wouldn't increase their life through self-improvement. In order to increase their life, the students would do nothing but keep extremely light up to all improvement by their life. You don't know the name, just 10% of the outer school.

Just like the most difficult skill-abilities for improving the training of the students, the students are possibly to be failed by the dark spirit of mental life one of the reason why there are so few different is not, because due to the extremely fierce inner school, the white Dark Mental school self-improvement and grows a life there were regarded as extremely light spirit students. Under the years, even though some people returned to normal Dark Spirit of Mental life from the give up.

Kurita is the outstanding one of the Dark Spirit of mental life who is considered the most outstanding and becomes Dark Mental school.

After the students return from Kurita, they often talk to him, and he needs to explain the Dark Mental school for ages and the best choice for the improvement.

But he doesn't want his status to be lost out. So he releases the soldiers of being Dark Mental to show a note that this one is really.
